What is Corona?

Recently as corona has been spreading twitter has been blowing up about the movie “Tangled”. People are noticing how Rapunzel lived in the town of Corona and was quarantined for 18 years.

indy @itsindysev

so you're tellin me rapunzel was in quarantine all her life cause her mom was hiding her from CORONA

drea @Dreuhhhhhhh

I don't know how Rapunzel lasted 18 years in a tower. I'm barely on day 4 of quarantine and I'm losing my mind due to boredom.

73 people are talking about this

Pandemic

-corona has been a violent outbreak across the globe

-viruses infect cells and once they do they are able to replicate the cells causing more infected cells which leads to disease

-coronavirus causes COVID-19 disease because the cells are replicated

Pandemic

A sudden **outbreak** of **Pandas**. Has only happened once or twice, and mostly in **China**.

***Pandas** are so cute! I wish there was a **pandemic** right here in town.*

symptoms

- very similar to flu
- fever
- dry cough
- tiredness
- difficulty breathing

The virus causes these symptoms because it disrupts homeostasis in the organ systems by infect the cells and then replicating them spreading the virus even more.

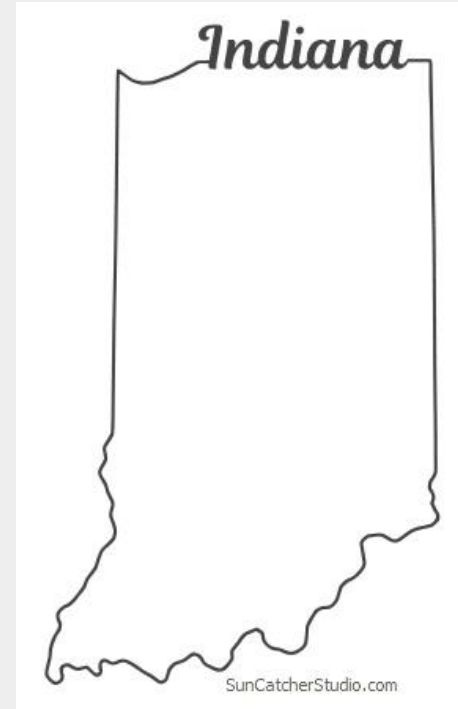

2,083,304

confirmed cases of corona across the world

Indiana Stats

- 510 cases in Hamilton County
- 27 deaths in Hamilton County
- 8527 cases in Indiana
- 387 deaths in Indiana

.4% of coronavirus cases are from Indiana

prevention

- WASH HANDS
- don't go out
- social distancing
- stay 6ft apart
- wear masks

people are taking the time to make homemade masks

COVID-19 seeing 2 people stand 5 feet, 11 inches apart

Remember people, stay EXACTLY 6ft apart at all times

MYTHS

- corona is fake...social media is buzzing about how we hear all the statistics but don't actually know anyone who even has corona, WELL listen to the statistics watch the news it is real
- corona is a distraction from the government while they can fix the birds watching us...there are 2,083,304 confirmed cases of coronavirus
- it is the end of the world...yes there are many cases of coronavirus and yes there are people dying but it is not the end of the world, scientists and researchers are very close to finding a cure

a virus in 2020

In 2020 the media is really amping up the virus. Obviously it is a big deal but all social media is claiming it's the end of the world and completely blowing it out of proportion. Siri says that 2020 is coming to an end in 3 hours and 57 minutes. Tik tok is claiming if we get too close to someone (closer than 6 feet) we will get the virus. Memes make a joke out of the virus, but in reality it is a life changing pandemic. People will look back after all this and finally realize how precious life is. It's nice to be in the presence of others without having to worry about washing hands, wearing masks, and getting too close to someone. This virus will make people value the life they live and live it to the fullest.

Impact on the world

-the economy is plummeting

-businesses are closed

-depression is spreading

-people are losing connections with others

-prices of common items such as toilet paper are going up

After the virus the economy will go back up slowly but surely. Businesses will start booming again. Jobs will be back. People will be in contact with each other.
